Our son, Ryker, has albinism, a genetic condition that causes lack of pigment in the hair, skin, and eyes.  Albinism causes a range of visual impairments in those who have it.

NOAH, the National Organization for Albinism and Hypopigmentation is a non-profit organization.  NOAH works to provide information and support to people with albinism and their families.  NOAH strives to educate medical and educational professionals and the general public about albinism.

Please join us at the Village Bowl to help raise money for this great organization.  If you are unable to attend but would still like to donate, please visit the event website at: www.noah.kintera.org/bowl16 and search for Kelli Meister to make an online donation for our team.
